

LIGHTWEIGHT | HIGH-POWER

- The Labino® UV LED Torch is a small-sized, lightweight, durable UV-A LED flashlight designed for quick inspections and access to "hard-to-reach" spots.
- This small portable flashlight measures only 14 cm long (5.5 inches). It's small enough to fit in a shirt pocket, or you can keep it close and secure with the included belt holster.
- This high powered LED flashlight produces a narrow intense ultraviolet beam measuring over **8000 $\mu\text{w}/\text{cm}^2$** at a distance of 400 mm (15.7 inches)
- A single ultraviolet light emitting diode (LED) creates UV light that peaks at **365 nm** making it suitable for **industrial, leakage and security applications.**
- The expected lifetime of the single LED is approximately **50,000 hours!**
- Full power is reached instantly. The on/off button is recessed in the back of the lamp to prevent accidental activation.
- At full charge the battery provides up to **8 hours** of use. Recharge from a normal outlet or vehicle with included chargers. Also includes an extra battery which means you can work uninterrupted.

MAKES IT BRIGHT

- ✓ Compact palm-sized
- ✓ High UV intensity
- ✓ Rechargeable batteries
- ✓ Long-lasting light source
- ✓ Durable lightweight construction

Includes: UV LED flashlight, belt holster, two chargers and one extra battery

TECHNICAL SPECIFICATION

UV LED

- UV source: one 5W UV LED
- Intensity: 8.000 $\mu\text{w}/\text{cm}^2$ at 400 mm (15.7 cm)
- Peak: 365 nm
- Expected LED life: approx. 50,000 hours

Battery

- Battery type: Lithium-Ion
- 2200 mAh (2.2 amp) Lithium-Ion, 3.7 volts
- Battery life: approx. 8 hrs
- Initial charging time: 12 hrs.
- Re-charge time: approx. 2 hrs
- Included: two (2) batteries

Charger

- Includes 100-240 VAC charger for use from electrical outlet
- Includes 12 V charger for use in vehicle via cigarette lighter connection
- Capacity: two batteries can be charged simultaneously

Dimensions

- Length: 14cm (5.5 inches)
- Weight with battery: 145 gr. (5.1 oz)
